

MAK MLO LITE

Mosquito Larvicial Oil

Description

MAK MLO LITE (Mosquito Larvicidal oil) is formulated with light colored petroleum distillate especially for mosquito control. Mosquito Larvicidal oil can provide effective control on mosquito by damaging the larvae of mosquito. It kills larvae by suffocating them.

Application

MAK MLO LITE is applied on the water surface by spray technique forming a thin, continuous and stable (for few hours) film. This film prevents the passage of oxygen into water. A larva which comes to the surface for breathing cannot get oxygen and hence dies.

Effective against *Anopheles stephensi* & *Aedes aegypti* mosquito larvae.

Benefits

- Toxicity test of our MAK MLO LITE has been carried out at Haffkine Institute for Training Research & Testing, Mumbai.
- Highly effective control on larvae is achieved
- Already being used by Municipal Corporations of various cities

Performance Level

- IS 588: 1978

Storage and Handling

- Indoor Storage is always preferable
- Barrels should be kept horizontally with bunk position at 3 O'clock 9 O'clock position
- Barrels should be kept away from dusty or heated areas.
- During handling any contact with dust must be avoided.

Technical Specifications

Characteristics	ASTM	MAK MLO LITE
Appearance	--	Clear & Bright
Colour, Visual	--	Yellow
Density @ 15°C, gm/l	D1298	0.8450
Kinematic Viscosity @ 40°C, in cSt	D445	6.2
Pour point, °C	D97	0
Flash point, °C	D92	82

All the mentioned values are typical which may vary from batch to batch

Health and Safety

These oils are not hazardous under normal conditions of use. For further guidance appropriate Material Safety Data Sheet (MSDS) may be referred.

Advice
